

Interstuhl presented its products at the Guangzhou Design Week in China and received the Kapok Design Award 2016 for its product UPis1.

Interstuhl presents its products at many international trade fairs. It is exciting for us to see how other markets react to the products. At the Guangzhou Design Week in China, UPis1 not only received the Kapok Design Award but was also listed in the prestigious "Best of the best products" category.

The Guangzhou Design Week is a trade fair aimed at architects, designers and developers. Trade fairs like these provide Interstuhl with an opportunity to initiate promising contacts and to receive international feedback.
